This CV (up to date): gron.sk/cv

## Summary

Mathematician by training, computer science PhD, with experience in both corporations and startups, I worked in range of roles from software engineering to data and ML engineering, and in range of fields from computer vision for airborne collision avoidance to AI for code repair and search. I am a private pilot and paramedic assistant in my free time. In software development, my priorities are systematism and clear communication.

- 7 years industry (Software Engineering)
- 6 years academia (PhD, Computer Science)

## Skills

Listed below are the skills split into “fresh” and “past” (“secondary”) ones. The latter can be brushed up quickly.

### “Fresh” Areas of activity

- NLP for code repair and search
- Productionizing and serving of the whole ML stack
- Data pipelines and orchestration
- Team growth, processes organization
- MSc/BSc theses advisory, mentorship

### Main programming languages

- C++
- Python
- Go

### Stacks, Tools, & Software frameworks

- CI/CD: Bazel, Pantsbuild, CircleCI, Github Actions
- Data: Redis, MongoDB, MariaDB, Parquet
- Cloud: GCP/AWS, GCS/S3
- Deployment: k8s, Terraform, Envoy, Docker
- Various Libs: GTest, Abseil, Luigi
- Observability: Datadog, OpenCensus, Prometheus, Grafana
- ML Training: PyTorch, Tensorflow; Determined AI, W&B, Vertex AI
- ML Serving: Huggingface, ONNX
- Org: Phabricator, JIRA, UML/C4

### “Past” and “Secondary” Areas of activity

- Computer vision for autonomous flight
- Object detection, collision avoidance
- NN verification and certification
- Question reformulation, morphological analysis
- Theoretical ML, statistical learning theory
- Algorithmic robustness under uncertainty

### Programming languages & Software frameworks

- OpenCV
- PyMC3, Networkx, OSMnx
- Rust, C#, Qt4
- COM/WinAPI/MFC
- Web (CSS/JS/Hugo)

### Stacks & Tools

- CI/CD: Google's Blaze, Mercurial, Bazaar, SVN
- Data: Apache Beam, RabbitMQ
- Databases: MySQL, PostgreSQL
- Cloud: Google's Borg
- Typesetting:  $\text{\LaTeX}$

---

## Working Experience

Apr'21–curr. **Tech lead manager, Software engineer (ML)**, Snyk ([snyk.io](https://snyk.io) ) , Zurich, Switzerland

**snyk**

- Launched two tools for code repair and code search ([gron.sk/snyk-fix](https://gron.sk/snyk-fix) ) , including serving design and implementation; worked with adjacent teams to set the technical directions, roadmaps and priorities.
- Built the infrastructure for training/evaluation/serving of large NLP models for code repair and search.
- Designed and built various internal tooling. Oversaw transition of ML computation pipelines to the cloud.
- Oversaw development of in-house data labelling service and organized labelling collaborations with external parties.
- Jan'22 onwards: led and grew a team of (currently) 6 ML engineers; advised MSc thesis (with ETH Zurich).
- Skills: C++17/20, Python/PyTorch (for NLP/LLM), Go, Bazel, k8s (GKE/Amazon EKS), Helm, Envoy, Docker; Language Server Protocols; production cycle, requirements management, mentoring, people management.

Dec'20–Feb'21 **Senior data engineer**, SIX Banking Services, Zurich, Switzerland

- Organized technical stack, code review and other processes in a newly established data science unit.
- Performed analytical support of stakeholder business units, provided analysis and computed KPIs for ongoing projects in payment ecosystems.
- Participated in preparatory work for transition to cloud pipelines.
- Skills: Python, Geospatial analysis, Microsoft Azure (Data Factory, DataLake, Databricks), JFrog Artifactory, data security and compliance.

Jun'18–Oct'20 **Machine learning & computer vision engineer**, Daedalean AI ([ddln.ai](https://ddln.ai) ) , Zurich, Switzerland

- Prototyped real-time visual air-to-air object detection and tracking system (Daedalean's core product, (Daedalean's core product )).
- Designed and built and in-house model evaluation framework. Shaped out data acquisition and annotation strategies. Defined evaluation metrics, navigated aviation industry standards on operational performance.
- With European Aviation Safety Agency, co-authored the guidelines on the concepts of safety assurance for neural networks (co-authored [gron.sk/codann](https://gron.sk/codann) ) , see "Publications").
- Supervised interns/MSc students. Carried out flight tests as a fixed-wing aircraft pilot.
- Skills: C++14, Python, Tensorflow, Git, object detection and tracking, cloud computing and automation (GCP/KubeFlow/Jenkins), technical ownership, requirements design, product development cycle.

May'17–Sep'17 **Research intern**, Research and Machine Intelligence, Google Zurich, Switzerland

**Google AI**

- Worked on answer ranking module for active question reformulation (see Google AI blog post ).
- Developed several deep learning models for answer ranking.
- Skills: Python, C++11, Tensorflow, NLP, experimental design, MapReduce.

Aug'12–Mar'18 **Doctoral research assistant, head teaching assistant**, Machine Learning Group, Department of Computer Science, ETH Zurich, Switzerland

- Conducted research in both theoretical and practical fields (see "Projects" below).
- Launched medical collaborations with University Hospital Zurich.
- Supervised several MSc theses.
- Taught "Introduction to Machine Learning" and "Statistical Learning Theory" courses, created a script for the latter.

Apr'10–Aug'12 **C++ software engineer**, ABBYY Software, Moscow, Russia

- Worked on a framework for automated native language understanding and translation.
- Designed, developed SDK wrappers for language morphology analysis and text classification.
- Skills: C++03, C#, COM/COM+/WinAPI, SVN, interface design, internal libraries, UML.

2008–2011 **Independent (freelance) C++ developer**

- Developed a cross-platform (Mac/Linux/Windows) tool for photo management, sold and maintained it ([archive GitHub](https://archive.github.com) ).
- Skills: C++03, Qt 4, MercurialHg, PostgreSQL, presentation skills.

---

## Research Projects, Working Groups, Publications and Talks

### Working Group

**Concepts of Design Assurance for Neural Networks (CoDANN [↗](#))**, European Aviation Safety Agency (EASA) and Daedalean AG

- Participated in a working group ([gron.sk/easa](#) [↗](#)) which aimed at establishing methods and concepts for ensuring operational safety of machine learning models in aviation.
- Co-authored a report “Concepts of Design Assurance for Neural Networks”, whose official summary ([gron.sk/codann](#) [↗](#)) was published by EASA.

### Research Projects & Publications

**Statistical Mechanical Analysis of Combinatorial Free Energy**, ETH Zurich with Center of Science of Information, Purdue University

- “On Phase Transitions of Free Energy in Combinatorics” *International Conference on Analysis of Algorithms (AofA) 2017, Princeton*
- “Phase Transitions in Parameter Rich Optimization Problems” *Analytic Combinatorics (SODA-ANALCO) 2017, Barcelona*
- “Free Energy Rates for a Class of Optimization Problems” *International Conference on Analysis of Algorithms (AofA) 2014, Paris*
- “Asymptotic Evaluation of Posterior Agreement for some Optimization Problems” *J. of Theor. Comp. Sci. (TCS) 2018*

**Robustness and Informativeness of Minimum Spanning Tree Algorithm**, ETH Zurich

- “On Informativeness and Robustness of Algorithms” *Joint ETH & Google Workshop, Google, Zurich, 2016*
- “How Informative are Minimum Spanning Tree Algorithms” *International Symposium on Information Theory (ISIT) 2014, Hawaii*

**Machine Learning for Cardiological Diseases**, ETH Zurich with University Hospital Zurich and MPI Tübingen, Germany

- Detecting causal and statistical dependencies between key factors of Acute Coronary and Takotsubo syndromes.
- Launched and co-led the project initially, supervised BSc and MSc theses.

**Robust Solving of Algorithmic Problems**, ETH Zurich with Institute of Theoretical Informatics, Zurich

- “Robust Optimization in the Presence of Uncertainty: a Generic Approach” *J. of Computer and System Sciences (JCSS) 2018*

---

## Education

2012–2018

**Doctoral degree (Dr. Sci. ETH)**, Machine Learning Group, Department of Computer Science, ETH Zurich, Switzerland

- Ph.D. Thesis “Statistical Mechanics and Information Theory for Approximate Robust Inference” ([gron.sk/thesis](#) [↗](#)).

2006–2011

**BSc + MSc**, Department of Mathematics and Mechanics, Chair of Discrete Mathematics, Moscow State University of M.V. Lomonosov (MSU), Russia

- Specialist (equiv. BSc + MSc) degree in Pure and Applied Mathematics, with Honors.
- Thesis “On some metrical properties of Boolean functions” ([gron.sk/msc-thesis](#) [↗](#)).

---

## Languages

- |                     |        |                    |                          |
|---------------------|--------|--------------------|--------------------------|
| ◦ Russian . . . . . | native | ◦ German . . . . . | fluent (C2 Goethe, 2016) |
| ◦ English . . . . . | fluent | ◦ French . . . . . | fluent (C1 DALF, 2011)   |

---

## Volunteer Work

2014–2021 **Ambulance assistant (Emergency Medical Technician, EMT)**, Zurich Fire & Rescue Service, Switzerland

- Regularly trained as an ambulance assistant.
- Participated in ambulance shifts during public events in the city of Zurich.
- Was a first responder to alarms from large-scale emergencies.

2007–2012 **Lecturer/Teacher**, MSU-/MIPT-based summer and winter schools [↗](#) for mathematics and programming, Russia

- Created original lecture/seminar materials.
- Conducted lectures and seminars for high school students.
- Topics: mathematical analysis, discrete mathematics, programming.

---

## Hobbies and Other Activities

Aviation **Pilot**, SWISS Flying Club ([www.swissflyingclub.ch](http://www.swissflyingclub.ch) [↗](#)), Hausen am Albis, Switzerland

- Private Pilot License (PPL(A)), single engine piston (SEP) class rating.
- 120+ hours flight time.

Programming contests

- II prize team, All-Russia Programming Contest (2005).
- II prize team, Moscow Programming Contest (2005).

Sports & Music

- Karate (gold medal in Swiss Spring Kyu-tournament, 2014).
- Alpine skiing and snowboarding.
- Playing flute, guitar.

Pilot blog **Author**, Telegram channel “CrossWind Landing” (in Russian) ([gron.sk/x-wind](https://t.me/gron.sk/x-wind) [↗](#))

- Telling the story of learning for private pilot license in Switzerland.
- Topics about aerodynamics, meteorology, and the fun of flying.

Blog **Author**, Personal blog on range of topics ([gron.sk/posts](https://gron.sk/posts) [↗](#))

- Topics: aviation, tech, programming.
