This CV (up to date): *gron.sk/cv* ⌝

Summary

Mathematician by training, computer science PhD, with experience in both corporations and startups, I worked in range of roles from software eningeering to data and ML engineering, and in range of fields from computer vision for airborne collision avoidance to financial data analysis. I am a private pilot and paramedic assistant in my free time. In technological development, I value systematism together with efficient communication.

- 5 years industry (Software Engineering)
- 6 years academia (PhD, Computer Science)
- Permanent Swiss residence permit ("C")
- Married, two children

Skills

Listed below are the skills split into "fresh" and "past" ones. The latter can be brushed up quickly.

"Fresh"

Areas of activity

- Machine learning, deep learning
- Computer vision for autonomous flying
- Object detection, collision avoidance
- Data analysis, ETL pipeline engineering
- Neural networks verification and certification
- Navigating regulatory standards (e.g. aviation)
- MSc/BSc theses advisory

Programming languages

- C++ (strong)
- Python (strong)
- Go (confident)
- SQL (confident)

Software frameworks

- Tensorflow, Keras
- OpenCV
- gRPC/REST
- Pandas, Geopandas
- Scikit-learn, PyMC3
- Networkx, OSMnx
- Plotly, Dash, Folium

Stacks & Tools

- CI/CD: Bazel, Jenkins, Docker, Git
- Packages: Nix, JFrog Artifactory, Anaconda
- Data: Hadoop MapReduce, Spark, Parquet
- [No]SQL: Redis, MongoDB, MariaDB
- GCP: Storage, Computing, KubeFlow
- Azure: Databricks & DataLake, DevOps
- Organizational: Phabricator, JIRA, Confluence

"Past"

Areas of activity

- Natural Language Processing
- Question reformulation, morphological analysis
- Statistical Learning Theory
- Research on algorithmic robustness
- Teaching assistance
- SDK development
- Cross-platform programming

Programming languages & Software frameworks

- COM/COM+
- WinAPI/MFC
- C#
- Qt4
- OpenMP
- HTML/JS/CSS
- Hugo/Jekyll

Stacks & Tools

- CI/CD: Google's Blaze
- Data: Flume
- Databases: MSSQL, PostgreSQL
- Cloud: Google's Borg
- Organizational: UML, Database normalization analysis

Working Experience

2020–2021

Senior data engineer, SIX Banking Services, Zurich, Switzerland

- Organized technical stack, code review and other processes in a newly established data science unit.
- Performed analytical support of stakeholder business units, provided analysis and computed KPIs for various ongoing projects cash payments ecosystem.
- Participated in preparatory work for transition to cloud pipelines
- Skills: Python, Geospatial analysis, Mircosoft Azure (Data Factory, DataLake, Databricks), JFrog Artifactory, data security and compliance.

2018–2020

Machine learning & computer vision engineer, Daedalean AI (ddln.ai ⬀), Zurich, Switzerland

- Conceived and developed a prototype of a visual air-to-air object detection and tracking system (as part of autopilot collision avoidance).
- Researched, evaluated and made early technical decisions, shaped out data acquisition and annotation strategies. Developed evaluation metrics, navigated aviation industry standards on operational performance.
- As part of a 4-member team, worked with European Aviation Safety Agency on defining the concepts of safety assurance for neural networks (co-authored gron.sk/codann ⬀, see "Publications").
- Conceived, developed an extendable and modularized machine learning evaluation and reporting framework used across several projects.
- Co-supervised interns and joint MSc/semester students.
- Carried out flight tests as a fixed-wing aircraft pilot.
- Skills: C++14, Tensorflow, Git, object detection and tracking, cloud computing and automation (GCP/GKE/KubeFlow/Jenkins), operational performance metrics, technical ownership, requirements design, product development cycle.

summer 2017

Research intern, Research and Machine Intelligence, Google Zurich, Switzerland

- Worked on answer ranking module for active question reformulation (see Google AI blog post ⬀).
- Developed several deep learning models for answer ranking.
- Presented at monthly meeting of Google Research.
- Approved for full-time conversion by the hiring committee.
- Skills: Python, C++11, Tensorflow, experimental design, data processing, communication.

2012–2018

Doctoral research assistant, head teaching assistant, Machine Learning Group, Department of Computer Science, ETH Zurich, Switzerland

- Conducted research in both theoretical and practical fields (see "Projects" below).
- Launched medical collaborations with University Hospital Zurich (see www.cardioml.ch ⬀).
- Supervised several MSc theses.
- Taught "Introduction to Machine Learning" and "Statistical Learning Theory" courses, created a script for the latter.

2010–2012

**C++ software engineer**, ABBYY Software, Moscow, Russia

- Worked on a framework for automated native language understanding and translation.
- Designed, developed SDK wrappers for language
- morphology analysis and text classification.
- Skills: C++03, C#, COM/COM+/WinAPI, SVN, interface design, internal libraries, UML.

2008–2011

Independent (freelance) C++ developer

- Conceived and developed a cross-platform (Mac/Linux/Windows) tool for photo management, sold and maintained it.
- Skills: C++03, Qt 4, MercurialHg, PostgreSQL, selling and presentation.

Research Projects, Working Groups, Publications and Talks

Working Group

Concepts of Design Assurance for Neural Networks (CoDANN), European Aviation Safety Agency (EASA) and Daedalean AG

- Participated in a working group (gron.sk/easa ⧉) which aimed at establishing methods and concepts for ensuring operational safety of machine learning models in aviation.
- Co-authored a report "Concepts of Design Assurance for Neural Networks", whose official summary (gron.sk/codann ⧉) was published by EASA.

Research Projects & Publications

Statistical Mechanical Analysis of Combinatorial Free Energy, ETH Zurich with Center of Science of Information, Purdue University

- "On Phase Transitions of Free Energy in Combinatorics"
  International Conference on Analysis of Algorithms (AofA) 2017, Princeton
- "Phase Transitions in Parameter Rich Optimization Problems"
  Analytic Combinatorics (SODA-ANALCO) 2017, Barcelona
- "Free Energy Rates for a Class of Optimization Problems"
  International Conference on Analysis of Algorithms (AofA) 2014, Paris
- "Asymptotic Evaluation of Posterior Agreement for some Optimization Problems"
  J. of Theor. Comp. Sci. (TCS) 2018

Robustness and Informativeness of Minimum Spanning Tree Algorithm, ETH Zurich

- "On Informativeness and Robustness of Algorithms"
  Joint ETH & Google Workshop, Google, Zurich, 2016
- "How Informative are Minimum Spanning Tree Algorithms"
  International Symposium on Information Theory (ISIT) 2014, Hawaii

Machine Learning for Cardiological Diseases (www.cardioml.ch ⧉), ETH Zurich with University Hospital Zurich and MPI Tübingen, Germany

- Detecting causal and statistical dependencies between key factors of Acute Coronary and Takotsubo syndromes.
- Launched and co-led the project initially, supervised BSc and MSc theses.

Robust Solving of Algorithmic Problems, ETH Zurich with Institute of Theoretical Informatics, Zurich

- "Robust Optimization in the Presence of Uncertainty: a Generic Approach"
  J. of Computer and System Sciences (JCSS) 2018

Education

2012–2018

Doctoral degree (Dr. Sci. ETH), Machine Learning Group, Department of Computer Science, ETH Zurich, Switzerland

- Ph.D. Thesis "Statistical Mechanics and Information Theory for Approximate Robust Inference" (gron.sk/thesis ⧉).
2006–2011

BSc + MSc, Department of Mathematics and Mechanics, Chair of Discrete Mathematics, Moscow State University of M.V. Lomonosov (MSU), Russia

- Specialist (equiv. BSc + MSc) degree in Pure and Applied Mathematics, with Honors.
- Thesis "On some metrical properties of Boolean functions" (gron.sk/msc-thesis ⧉).

Languages

- Russian . . . . native
- English. . . . . fluent
- German . . . . . fluent (C2 Goethe, 2016)
- French . . . . fluent (C1 DALF, 2011)

Volunteer Work

2014–curr. **Ambulance assistant (Emergency Medical Technician, EMT)**, Zurich Fire & Rescue Service, Switzerland
- Regularly training as an ambulance assistant.
- Participating in ambulance shifts during public events in the city of Zurich.
- First responder to alarms from large-scale emergencies.

2007–2012 **Lecturer/Teacher**, MSU-/MIPT-based summer and winter schools ⧉ for mathematics and programming, Russia
- Created original lecture/seminar materials.
- Conducted lectures and seminars for high school students.
- Topics: mathematical analysis, discrete mathematics, programming.

Hobbies and Other Activities

Aviation **Pilot**, SWISS Flying Club (www.swissflyingclub.ch ⧉), Hausen am Albis, Switzerland
- Private Pilot License (PPL(A)), single engine piston (SEP) class rating.
- 120+ hours flight time.

Programming contests
- II prize team, All-Russia Programming Contest (2005).
- II prize team, Moscow Programming Contest (2005).

Sports & Music
- Karate (gold medal in Swiss Spring Kyu-tournament, 2014).
- Alpine skiing and snowboarding.
- Playing flute, guitar.

Pilot blog **Author**, Telegram channel "CrossWind Landing" (in Russian) (gron.sk/x-wind ⧉)
- Telling the story of learning for private pilot license in Switzerland.
- Topics about aerodynamics, meteorology, and the fun of flying.
